

Burlington, Vermont

Initial Partners: All City Departments

GOAL

LONG TERM GOAL:

1. support Burlington's vision to be a vibrant, diverse, and livable community that fosters innovation and nurtures the lives of all residents;
2. use information and technology to operate more efficiently and effectively, better steward our assets, resources and infrastructure, and improve health, wellbeing and safety.

LONG TERM TARGET:

a secure, permission-based analytics platform by which data from 16 City departments can be accessed shared and evaluated to support data driven decision making, performance measurement, operational efficiency and data transparency.

TIMEFRAME TARGET – *end of 2020*

KEY SOLUTIONS

- *Develop and implement a phased approach;*
- *Begin with Phase 1 around public domain property records data base (i.e. Code, Fire, Electric, Assessors);*

KEY STAKEHOLDERS

Phase I Stakeholders include:

- *Mayor*
- *16 Department heads*
- *Key IT personnel*
- *Marketing specialist*
- *External vendor support*

Background Info:

Phased approach with first set of actions to be completed by March 2018;

Working with public domain information (help create initial success while reducing anxiety around data sharing);

Phase 2 will broaden our stakeholder outreach and engagement.
